

Forex Forecasting Algorithm using Machine Learning

T.R.R.Peiris

MS20909932

M.Sc. in IT

Specialized in Information Technology

Supervisor: Mr. Prasanna S. Haddela

November 2021

18236

**Department of Information Technology
Faculty of Graduate Studies and Research
Sri Lanka Institute of Information Technology**

Table of Contents

Table of Contents.....	ii
List of Figures	iv
List of Tables	v
Chapter 1.....	1
1.1 Chapter Overview	1
1.2 Introduction	1
1.3 Problem definition	3
1.4 Importance of FOREX Forecasting	4
1.5 Determination of exchange rate.....	6
1.6 Economic factors that affect to currency market	7
1.7 Political Conditions.....	7
1.8 Psychology in the market.....	8
1.9 Features of the system.....	8
1.10 Resource requirements.....	9
Hardware resource requirements	9
Software resource requirements	9
Data resource requirements.....	10
1.11 Limitations.....	10
1.12 Chapter summery	10
Chapter 2 Research Objectives & Research Questions.....	11
2.1 Chapter Overview	11
2.2 Project Aim.....	11
2.3 Research Questions	11
2.4 Main Objective	11
2.5 Sub Objective	11
2.6 Statistical data utilization.....	12
2.7 Research Contribution	12
2.8 Significance of the thesis	12
2.9 Chapter summery	15
Chapter 3 Literature Review	16
3.1 Chapter overview.....	16
3.2 Literature Review.....	16
3.3 Chapter summery	31
Chapter 4 Methodology.....	32
	ii

4.1 Chapter Overview	32
4.2 Data Science Methodology and Approach.....	32
4.3 Feasibility Studies.....	33
4.4 Data set and collection method.....	34
4.5 Feature Selection	36
4.6 Data preprocessing method.....	38
4.7 Least Squared model and RSMA	39
4.8 Normalizing the data.....	40
4.9 Structure of the time series data	40
4.10 Trend Prediction	41
4.11 Simple moving averages	41
4.11.1 Simple moving averages cross overs	42
4.11.1 Linear regression model.....	43
4.12 Forecasting model.....	45
4.13 Detailed architecture	47
4.13.1 Artificial neural network	48
4.13.2 Structure of the neural network.....	48
4.13.3 Long-Short-Term Memory (LSTM)	49
4.13.4 LSTM learning process for forex forecasting	53
4.14 Chapter summery	56
Chapter 5 Experimental Results.....	57
References	60
Appendix	63
Appendix 1: Framework and software tools.....	63

List of Figures

Figure 1.1 Main foreign exchange markets turn over -1997-2007, measured by billions of USD	2
Figure 1.2: Forex Market Volatility	3
Figure 1.3 Support and Resistance Area	5
Figure 1.4 Buy Pressure Candlestick Pattern	6
Figure 1.5 Proposed Forecasting System	8
Figure 4.1 data science methodology	32
Figure 4.2 data process flow	35
Figure 4.3 row data	36
Figure 4.4 Moving averages cross overs	43
Figure 4.5 linear regression process	44
Figure 4.6 Detailed architecture of the proposed model	47
Figure 4.7 Neural network model structure	49
Figure 4.8 Recurring neural network structure	50
Figure 4.9 LSTM Structure	50
Figure 4.10 Cell state	51
Figure 4.11 Gate	52
Figure 4.12 Batches of data	54
Figure 5.1 Predicted output	57

List of Tables

Table 1.1 Most Traded Currencies	6
Table 2 Feature selection	37
Table 3 Feature selection scores	37
Table 4 Data set with NaN values	38
Table 5 After remove NaN values	38
Table 6 Trend prediction output variation with learning rate and iteration	58
