

# **IoT For Sustainable Farming Without Soil: Reinforcement Learning For Device Interaction**

**D. L. K. S. Liyanage**  
MS20911508  
M.Sc. in IT  
Specialized in EAD

Supervisor : Dr. Anuradha Jayakodi

November 2021

**Department of Information Technology  
Faculty of Graduates  
Sri Lanka Institute of Information Technology**

# Table of Contents

Table of Contents.....	2
Chapter 1 Introduction .....	3
1.1 Background Study .....	3
1.2 Literature Survey.....	4
1.3 Motivation.....	6
Chapter 2 Background .....	8
2.1 Related Work .....	8
2.2 Markov decision process.....	13
2.3 Markov Reward Process (MRP).....	14
Chapter 3 Data and Methods.....	15
3.1 Processing Filters .....	15
3.2 Setting Up for testing .....	16
3.3 Determining the Optimal function and Simulated Annealing (SA).....	17
3.4 The ideology for the method .....	18
3.5 The methodology.....	19
3.6 Case Study : ESP32 with motor and bulb .....	20
3.7 The framework.....	22
3.8 Performance indicators and matrices.....	24
Chapter 4 Results and Conclusion .....	26
4.1 Conclusion.....	26
4.2 Learning ability.....	26
4.3 Future Recommendations .....	28
Bibliography .....	29
Appendix .....	31
Appendix 1: A map of main attributes in the Agricultural system.....	31
Appendix 2: Action map of the system.....	33
Appendix 3: An edge calculation.....	35
Appendix 4: A pseudo code for state space and actions .....	36
